

# Fisher™ ET, EAT, and ETR Sliding-Stem Control Valves

Fisher ET, EAT, and ETR general-purpose control valves (figures 1, 2, and 3) are used for throttling or on-off control of a wide variety of liquids and gases. All three valve designs have single ports, balanced valve plugs, and cage guiding. Metal-to-PTFE seating for stringent shutoff requirements is standard in all valves except those with Cavitrol™ III cages. Metal-to-metal seating for higher temperatures is standard for valves with Cavitrol III cages and optional for all other valves.

The temperature limits of ET valves can be extended above 232°C (450°F) by using PEEK (PolyEtherEtherKetone) anti-extrusion rings in combination with a spring-loaded PTFE seal. The PEEK anti-extrusion rings expand to close off the clearance gap between the plug and the cage where the PTFE seal may extrude at high temperatures and pressures. The temperature limits are extended to 316°C (600°F) for non-oxidizing service and to 260°C (500°F) for oxidizing service.

The ET product line is available for a wide range of applications, including sulfide and chloride stress-cracking environments common to the oil and gas production industries. To discuss available constructions, contact your [Emerson sales office](#) or Local Business Partner and include the applicable codes and standards required for these environments.

## The easy-e™ Valve Family

ET, EAT, and ETR control valves are part of the versatile easy-e family of Fisher industrial control valves. easy-e valves share the following characteristics:

- Multiple trim material choices
- Interchangeable, restricted-capacity trims and full-sized trims to match variable process flow demands
- Different cage/plug styles that provide particular flow characteristics for highly-specialized applications. The standard cage comes in three different flow characteristics: quick-opening, linear, or equal percentage.
- Whisper Trim™ I, Whisper Trim III (figure 6), and WhisperFlo™ cages (figures 4 and 5) attenuate aerodynamic noise in gaseous service.
- To help eliminate cavitation damage in a properly-sized valve, a standard-travel, Cavitrol III, one-stage cage (figure 8) and a long-travel, Cavitrol III, two-stage cage are available in the NPS 1 through NPS 8 ET control valve.

**FISHER ET CONTROL VALVE  
WITH 667 ACTUATOR**

## Features

- **Compliance with the Clean Air Act**—ENVIRO-SEAL™ packing systems (figures 9 and 10) that provide an improved stem seal to help prevent the loss of process fluid are available. These packing systems feature PTFE or Graphite ULF packing with live-loading for reduced packing maintenance.
- **PTFE Seating for Long-Lasting Shutoff Capability**—Controlled compression of standard seat construction protects PTFE disk between metal disk seat and disk retainer (figure 1). Only the edge of the PTFE disk is contacted by the flowstream during normal operation. Excellent shutoff is maintained by a backup ring or spring-loading that forces the valve plug seal ring against the cage (figure 1).
- **Valve Plug Stability**—Rugged cage guiding provides high valve plug stability, which reduces vibration and mechanical noise.

- **Cost-Effective Operation and Maintenance**

Economy—Increased wear resistance of hardened stainless steel trim means longer-lasting service. When inspection or maintenance is necessary, the body can stay in the pipeline during removal of trim parts. Balanced valve plug construction permits use of smaller, lower-cost Fisher actuators. The ETR valve also permits easy body interior access without having to remove the bonnet or actuator (figure 3). And, trim inventory costs are cut because dimensional standardization permits use of most standard easy-e trim parts.

- **Compliance with European Standards**—Valves are available with dimensions specified by EN/DIN standards. See figure 14.

- **Sour Service Capability**—Unless otherwise noted, references are to NACE MR0175-2002. Optional materials are available to meet NACE MR0103 and NACE MR0175 / ISO 15156. Material requirements under these standards vary by edition and year of issue; the specific standard must be specified.

## Specifications

### Available Configurations

**ET:** Single-port, globe-style control valve with cage guiding, balanced valve plug, and push-down-to-close valve plug action (figure 1)  
**EAT:** Angle version of ET control valve, used to facilitate piping or in applications where a self-draining valve is desired (figure 2)  
**ETR:** Same as ET control valve except with push-down-to-open valve plug action (figure 3)

### Valve Sizes and End Connection Styles

Flanged raised-face per EN 1092-1/B and see table 1

### Maximum Inlet Pressures and Temperatures<sup>(1,2)</sup>

As listed below, unless limited by maximum pressure drop or material temperature capabilities

#### Valves with Cast Iron Bodies

**Flanged:** Consistent with CL125B or 250B per ASME B16.1

#### Valves with Steel and Stainless Steel Bodies

**Flanged:** Consistent with CL150, 300, and 600<sup>(3)</sup> per ASME B16.34

**Screwed or Welding:** Consistent with flanged CL600 per ASME B16.34

### Maximum Pressure Drops<sup>(2)</sup>

Same as maximum inlet pressure for specific construction defined above, except where further limited as follows:

**All Valves Except Those with Cavitrol III, Whisper Trim III, and WhisperFlo Cages:** See figure 11.

**Valves with Cavitrol III Cages:** See figure 12.

**Valves with Whisper Trim III Cages:** 0.999  $\Delta P/P_1$  maximum for levels A1 through D3

**Valves for NACE MR0175 / ISO 15156 and MR0103:** See figure 13

### Shutoff Classifications Per ANSI/FCI 70-2 and IEC 60534-4

Class IV, V, or VI. See tables 2, 3, or 4

### Construction Materials

**Body, Bonnet, and Bonnet Spacer or Bottom Flange, if used:** ■ Cast iron, ■ WCC carbon steel, or ■ LCC carbon steel, ■ WC9 chrome moly steel, ■ CF8M

(cast 316 stainless steel), or ■ other materials upon request

#### Valve Plug, Cage, and Metal Seating Parts:

**All Valves Except Those with Cavitrol III or Whisper Trim III Cages:** See table 5

**Valves with Cavitrol III Cages:** See table 6

**Valves with Whisper Trim III Cages:** See table 8

**Valves with WhisperFlo Cages:** See table 7

**Bellows Seal Assembly:** ■ 316L stainless steel or

■ N04400

**All Other Parts:** See table 9

### Material Temperature Capabilities<sup>(2)</sup>

#### Body/Trim Combinations:

**All Valves Except Those with Cavitrol III or Whisper Trim III Cages:** See figure 11

**Valves with Cavitrol III Cages:** See table 6

**Valves with Whisper Trim III Cages:** See table 8

**Valves with WhisperFlo Cages:** See table 7

**Bolting For NACE MR0175 / ISO 15156 and MR0103:**

See table 19

**Bonnets:** See table 11

**All Other Parts:** See table 9

### Flow Characteristics

**Standard Cages:** ■ Quick-opening, ■ linear, or  
■ equal percentage

**Whisper Trim, WhisperFlo, and Cavitrol Cages:** Linear

### Flow Directions

#### ET

**Standard Cage:** Normally down

**Whisper Trim and WhisperFlo Cages:** Always up

**Cavitrol Cage:** Always down

#### EAT

**Standard Cage with Liner for Metal Seat:** Normally down

**Standard Cage without Liner:** Flow up or down

**Whisper Trim and WhisperFlo Cages:** Always up

#### ETR

**Standard Cage:** Normally up

**Whisper Trim Cage:** Always down

### Flow Coefficients and Noise Level Prediction

See table 12 and Catalog 12

-continued-

# Product Bulletin

August 2017

ET Valve

D100022X012

## Specifications (continued)

### Port Diameters and Maximum Valve Plug Travels

See tables 13, 15, and 16

### Yoke Boss and Stem Diameters

See table 14

### Typical Bonnet Styles

See table 11

### Packing Arrangements

**Standard Material:** Single PTFE V-ring

**Optional Materials:** See table 9

**ENIRO-SEAL Packing Systems:** See figures 9 and 10

*ENIRO-SEAL Packing Systems in vacuum service:*

Standard ENIRO-SEAL packing systems can be used in vacuum service with packing rings in standard orientation. Do not reverse the ENIRO-SEAL PTFE packing rings. Also, see Bulletin 59.1:061, ENIRO-SEAL Packing Systems for Sliding-Stem Valves ([D101633X012](#)).

### Approximate Weights

NPS 1: 14 kg (30 lb)  
NPS 1-1/2: 20 kg (45 lb)  
NPS 2: 39 kg (85 lb)  
NPS 2-1/2: 45 kg (100 lb)  
NPS 3: 57 kg (125 lb)  
NPS 4: 77 kg (170 lb)  
NPS 6: 159 kg (350 lb)  
NPS 8: 408 kg (900 lb)

### Optional Safety Instrumented System Classification

SIL3 capable — certified by exida Consulting LLC

### Additional Options

■ Lubricator, ■ lubricator/isolating valve, ■ drilled and tapped connection in extension bonnet for leak-off service, ■ body drain plug, ■ style 3 fabricated extension bonnet made on order to a specific length for cryogenic service, ■ style NS bonnet for seismic service requirements, ■ packings suitable for nuclear service, ■ Class V shutoff for ET above 232°C (450°F) using PEEK anti-extrusion rings

1. EN (or other) ratings and end connections can usually be supplied; consult your Emerson sales office.

2. The pressure or temperature limits in this bulletin, and any applicable code limitations, should not be exceeded.

3. Certain bonnet bolting material selections may require a CL600 easy-e valve assembly to be derated. Contact your Emerson Automation Solutions sales office for more information.

4. Limitation based on excessive noise increase if max ΔP/P<sub>1</sub> ratio for a given cage level is exceeded.

## ENIRO-SEAL Packing System Specifications

### Applicable Stem Diameters

- 9.5 mm (3/8 inches), ■ 12.7 mm (1/2 inches),
- 19.1 mm (3/4 inches), ■ 25.4 mm (1 inch), and
- 31.8 mm (1-1/4 inches) diameter valve stems

### Maximum Pressure/Temperature Limits<sup>(1)</sup>

To Meet the EPA Fugitive Emission Standard of 100 PPM<sup>(2)</sup>

For ENIRO-SEAL PTFE and ENIRO-SEAL Duplex packing systems: full CL300 up to 232°C (450°F)

For ENIRO-SEAL Graphite ULF packing: 104 bar (1500 psig) at 316°C (600°F)

### Construction Materials

#### PTFE Packing Systems

*Packing Ring and Lower Wiper:* PTFE V-ring<sup>(3)</sup>

*Male and Female Adaptor Rings:* Carbon-filled PTFE V-ring

**Graphite ULF Packing Systems:** Graphite rings

**Duplex Packing Systems:**

*Male and Female Adaptor Rings:* Carbon-filled PTFE V-ring

*Guide Bushings:* Carbon graphite

*Packing Rings:* Graphite composite

*Packing Washer:* PTFE

*Anti-Extrusion Washer:* Filled PTFE (not required for Graphite ULF or duplex packing)

*Lantern Ring:* S31600 (316 stainless steel) (not required for Graphite ULF packing)

*Packing Box Flange:* S31600

*Spring:* ■ 17-7PH stainless steel or ■ N06600

*Packing Follower:* S31600 lined with carbon-filled PTFE

*Packing Box Studs:* Strain-hardened 316 stainless steel

*Packing Box Nuts:* 316 stainless steel SA194 Grade 8M

1. Refer to the valve specifications in this bulletin for pressure/temperature limits of valve parts. Do not exceed the pressure/temperature rating of the valve. Do not exceed any applicable code or standard limitation.

2. The Environmental Protection Agency (EPA) has set a limit of 100 parts per million (ppm) for fugitive emissions from a valve in selected VOC (Volatile Organic Compound) services.

3. In vacuum service, it is not necessary to reverse the ENIRO-SEAL PTFE packing rings.

**Table 1. Available Constructions**

VALVE	VALVE SIZE, NPS	VALVE BODY MATERIAL AND END CONNECTION STYLE <sup>(1)</sup>							
		Cast Iron Valve Body		Carbon Steel, Alloy Steel, or Stainless Steel Valve Body					
		CL125 FF Flanged	CL250 RF Flanged	Screwed	RF or RTJ Flanged			Butt Weld	Socket Weld

VALVE	VALVE SIZE, DN	STEEL VALVE BODY MATERIAL AND RAISED-FACE END CONNECTION STYLE <sup>(2)</sup>							
		PN16	PN25	PN40	PN63	PN100			
ET	25, 40, 50, 65, 80, 100, 150, or 200	X	X	X	X	X			
EAT	25, 50, 80, 100, or 150	X	X	X	X	X			
ETR	25, 40, 50, 65, 80, or 100	X	X	X	X	X			

X = Available Construction.

1. End connection style abbreviations: FF - Flat Faced, RF - Raised Face, RTJ - Ring Type Joint.

2. End connection EN1092-1/B.

**Table 2. Shutoff Classifications Per ANSI/FCI 70-2 and IEC 60534-4**

Valve Design	Seating	Shutoff Class
All except those with Cavitrol III cages	PTFE	V Air Test
		V (optional)
		VI (optional) <sup>(3)</sup>
	Metal	IV (standard)
		V (optional) <sup>(1)</sup>
		VI (optional) <sup>(3)</sup>
ET with Cavitrol III one-stage cage	Metal	IV (standard)
		V (optional)
ET with Cavitrol III two-stage cages	Metal	V
ET and EAT w/ TSO (Tight Shutoff) trim (CL125 through 600)	Replaceable, protected soft seat	TSO <sup>(2)</sup> TSO is not an ANSI/FCI leakage class. Valves with TSO trim are factory tested to a more stringent Emerson Automation Solutions test requirement of no leakage at time of shipment. Test medium is water. Specify service ΔP when ordering. Shutoff class V.
ET w/ TSO (Tight Shutoff) trim (CL125 through 600)	Std or Cavitrol III trim. Replaceable, protected soft seat.	

1. Class V shutoff requires spring-loaded seal ring, radius-seat plug, and wide-bevel seat ring (not available with 8-inch port, quick-opening cage). Not available with trims 4, 29, and 85.

2. For additional information, contact your [Emerson sales office](#).

3. Refer to table 3.

# ENVIRO-SEAL, HIGH-SEAL Packing Systems

ENVIRO-SEAL and HIGH-SEAL packing systems offer exceptional sealing capabilities. These systems easily install in existing valves or can be purchased with new valves. These systems help seal the process to conserve valuable process fluid. The long-life and reliability of these systems also reduce maintenance costs and downtime.

For applications requiring compliance with environmental protection regulations, the unique ENVIRO-SEAL packing system (figure 10) and a unique ENVIRO-SEAL bellows seal system (figure 9) are offered. The emission control packing system keeps emission concentrations below the EPA 100 ppm requirement.

For an excellent stem seal in applications that are not environmentally-sensitive, the HIGH-SEAL Graphite

ULF packing system (figure 10) is offered. The HIGH-SEAL packing system provides improved sealing at pressure/temperature ratings beyond ENVIRO-SEAL limits.

ENVIRO-SEAL packing systems, available with PTFE, Graphite ULF, or duplex packing, and the HIGH-SEAL Graphite ULF packing system feature live-loading and unique packing-ring arrangements for long-term, consistent sealing performance.

## ANSI/FCI Class VI Shutoff Capabilities

ET valves with soft seat and metal seat constructions can provide ANSI/FCI Class VI shut-off capabilities. See tables 3 and 4.

**Table 3. Class VI Shutoff Availability<sup>(1, 2)</sup>**

Valve	Port Size, Inches	Seat	Minimum Seat Load
ET	$\geq 3.4375 \leq 7$	Soft	See Catalog 14
ET	$\geq 3.4375 \leq 7$	Metal	300 lbs/lineal inch

1. Limited retrofit capability. Consult your Emerson sales office.

2. Not for use with NPS 8.

**Table 4. Class VI Trim Materials**

VALVE	CAGE/SEAT RING RETAINER	VALVE PLUG	SEAT RING	SEAL RING	TRIM TEMPERATURE LIMIT	
					°C	°F

1. NACE compatible trims meets NACE MR0175 2002, MR0175/ISO15156, MR0103

2. Temperatures above 202°C (450°F) require PEEK anti-extrusion rings and spring loaded. This option allows ET construction to be used up to 316°C (600°F) for non-oxidizing service and 260°C (500°F) for oxidizing service

3. For high temperature service

4. 22 Cr-5 Ni duplex stainless steel

Figure 11. Typical Trim for All Valves Except Those with Cavitrol III, Whisper Trim III, or WhisperFlo Cages

**NOTES:**

- 1** Use trim 27 instead of trim 29 for nonlubricating fluids such as superheated steam or dry gases between 149°C (300°F) and 232°C (450°F).
- 2** Do not exceed the maximum pressure and temperature for the pressure rating of the body material used, even though the trims shown may have higher capabilities.
- 3** Trims 4 and 29 may be used up to 99 bar (1440 psi) with clean dry gas. For process fluids other than clean dry gas, use trims 4 and 29 only up to 21 bar (300 psi).
- 4** Trims 1, 27, and 37H temperature limits can be extended to 316°C (600°F) for non-oxidizing service or 260°C (500°F) oxidizing service if PEEK anti-extrusion rings are used with spring-loaded seal rings.
- 5** Use trim 37H instead of trim 37 for temperatures above 210°C (410°F). Requires anti-extrusion rings and spring-loaded seal rings for temperatures above 232°C (450°F).

**Table 9. Materials and Temperature Limits for Other Parts (continued)**

PART		MATERIAL	TEMPERATURE CAPABILITIES			
			°C		°F	
			Minimum	Maximum	Minimum	Maximum
Packing flange, studs, and nuts when used with standard bonnet		S31600 stainless steel	-29	... <sup>(5)</sup>	-20	... <sup>(5)</sup>
Metal packing box parts		S31600 or S17400 stainless steel depending on part	-29	... <sup>(5)</sup>	-20	... <sup>(5)</sup>
Extension bonnet bushing	Trims 1 & 4	S41600 stainless steel	-29	... <sup>(5)</sup>	-20	... <sup>(5)</sup>
	Other trims	S31600 stainless steel	-29	... <sup>(5)</sup>	-20	... <sup>(5)</sup>

1. For high-temperature air, hydrocarbons, and certain other chemicals and solvents. Not for use with steam or ammonia. Not recommended for water above 82°C (180°F).  
 2. Has excellent moisture resistance to hot water and steam and may be used with most fire-resistant hydraulic oils, but cannot be used with petroleum-based fluids and other hydrocarbons.  
 3. Cannot be used with fire-resistant hydraulic oils.  
 4. These parts not used with 137 mm (7 inch) ports or larger.  
 5. These materials not limiting factors.  
 6. This material may be used in temperatures up to 260°C (500°F) for oxidizing service.  
 7. Standard for NPS 8 valve regardless of cage and all NPS 1 thru 6 valves with Cavitrol III cages, optional in NPS 1 thru 6 valves with other than Cavitrol III cages.

**Table 10. Fisher ET Valve Body/Trim Temperature Capabilities For All Valves Except Cavitrol III, Whisper Trim III Cage, and NPS 4, 6, and 8 ET with WhisperFlo Cage**

1. Temperatures above 232°C (450°F) require PEEK anti-extrusion rings and spring-loaded seal ring. This option allows ET construction to be used up to 316°C (600°F) for non-oxidizing service and 260°C (500°F) for oxidizing service.  
 2. Lubricating service allows usage to 232°C (450°F)  
 3. Same material also used for bottom flange, if required. Restricted trim and full-sized limits are the same.  
 4. May be used down to -254°C (-425°F) if manufacturing process includes Charpy impact test.

**Table 11. Bonnet Selection Guidelines**

BONNET STYLE	PACKING MATERIAL	IN-BODY PROCESS TEMPERATURE LIMITS <sup>(1)</sup>		
		°C	°F	
Plain: ■ Standard for all valve sizes through NPS 6 with 2-13/16 yoke boss diameter ■ Standard for NPS 6 and 8 valves in cast iron and WCC steel bonnet material with 3-9/16 yoke boss diameter	PTFE V-ring	-18 to 232	0 to 450	
	PTFE/Composition	-18 to 232	0 to 450	
	Graphite ribbon/filament	0 to 316 <sup>(2)</sup>	0 to 600 <sup>(2)</sup>	
Style 1 Cast Extension: ■ Standard for NPS 8 valves in S31600 bonnet material with 3-9/16 yoke boss diameter	PTFE V-ring	-46 to 316 <sup>(2)</sup>	-50 to 600 <sup>(2)</sup>	
	PTFE/Composition			
	Graphite ribbon/filament			
Style 2 Cast Extension: ■ Optional for NPS 2 through 4 valve sizes with 2-13/16 inch yoke boss diameter ■ Optional for NPS 6 and 8 valves with 3-9/16 yoke boss diameter. Not available for NPS 8 valve in S31600 bonnet material	PTFE V-ring	-101 to 316 <sup>(2)</sup>	-150 to 600 <sup>(2)</sup>	
	PTFE/Composition			
	Graphite ribbon/filament			
ENVIRO-SEAL bellows seal bonnet	PTFE	For exceptional stem sealing capabilities. See Bulletin 59.1:070, ENVIRO-SEAL Bellows Seal Bonnets ( <a href="#">D101641X012</a> ), for pressure/temperature ratings.		
	Graphite ULF	For exceptional stem sealing capabilities. See Bulletin 59.1:070, ENVIRO-SEAL Bellows Seal Bonnets ( <a href="#">D101641X012</a> ), for pressure/temperature ratings.		

1. These in-body process temperatures assume an outside, ambient temperature of 21°C (70°F) and no insulation on the bonnet. When using any packing at low process temperatures, a cast extension bonnet may have to be used to prevent packing damage which could result from the formation of valve stem frost. Material selection for trim and other components will also be limiting factors.  
 2. Temperatures above 232°C (450°F) require PEEK anti-extrusion rings and spring-loaded seal ring.

1. This column lists the percent reduction of published maximum  $C_v$  of the trim listed in the TRIM column.

Figure 13. Typical Trim for NACE MR0175 / ISO 15156 and MR0103 (Sour Service)

A6739-1

Notes:

- 1** Use trim 87 instead of trim 85 for nonlubricating fluids such as super-heated steam or dry gases between 149°C (300°F) and 232°C (450°F).
- 2** Do not exceed the maximum pressure and temperature for the pressure rating of the body material used, even though the trims shown may have higher capabilities.
- 3** Trim 85 may be used up to 99 bar (1440 psi) with clean dry gas. For process fluids other than clean dry gas, use trim 85 only up to 21 bar (300 psi).
- 4** Trim 87 temperature limits can be extended to 316°C (600°F) for non-oxidizing service or 260°C (500°F) for oxidizing service if PEEK anti-extrusion rings are used with spring-loaded seal rings.

**Table 18. Metal Trim Part Materials for Compatibility with NACE MR0175 / ISO 15156 and MR0103 (Sour Service) Specifications. Environmental Restrictions Apply, Refer to Standard.**

Trim Designation <sup>(4)</sup>	Valve Plug	Cage	Seat Ring for Standard Metal Seat Construction	Optional Liner for Metal Seat (EAT only)	Disk Seat and Retainer for Optional PTFE-Seat Construction	Valve Stem, Packing Follower, Lantern Ring, Packing Box Ring, and Pin	Load Ring <sup>(1)</sup>
85 <sup>(5)</sup>	S31600	316 SST with electroless nickel coating (ENC)	S31600	S31600	---	S20910 (Valve Stem) S31600 (All Other Parts)	N05500
85C <sup>(2, 5)</sup>	S31600	316 SST with electroless nickel coating (ENC)	---	---	S31600		
86 <sup>(5)</sup>	S31600 with seat hard faced with CoCr-A hardfacing alloy	316 SST with electroless nickel coating (ENC)	R30006 (alloy 6)	---	---		
87 (Also used for 8-inch Whisper Trim I)	S31600 with seat and guide hard faced with CoCr-A hardfacing alloy	316 SST with electroless nickel coating (ENC) <sup>(3)</sup>	R30006 (alloy 6)	---	---		
87C <sup>(2)</sup> (Also used for 8-inch Whisper Trim I)	S31600 with seat and guide hard faced with CoCr-A hardfacing alloy	316 SST with electroless nickel coating (ENC) <sup>(3)</sup>	---	---	S31600		

1. NPS 8 valve body only.  
 2. 85C and 87C are trims for PTFE-seat construction.  
 3. 8-inch Whisper Trim I cage is 17-4 SST, double H1150 (NACE) / ENC.  
 4. N07750 retaining ring is standard for spring-loaded seal ring construction.  
 5. Not for use with Whisper Trim I with 136 mm (5.375 inch) and larger ports.

**Table 19. Bolting Materials and Temperature Limits for Bolting Compliance with NACE MR0175-2002, NACE MR0175/ISO 15156, and NACE MR0103. Environmental restrictions may apply**

VALVE BODY MATERIAL		BOLTING MATERIAL	TEMPERATURE CAPABILITIES			
			°C		°F	
			Min	Max	Min	Max
<b>Non-exposed bolting (Standard)</b>						
WCC and CF8M (316 SST)	Studs	Steel SA-193-B7	-48 <sup>(2)</sup>	427	-55 <sup>(2)</sup>	800
	Nuts	Steel SA-194-2H				
<b>Exposed bolting (Optional)</b> <b>May require derating of valve<sup>(1)</sup> when these body-to-bonnet bolting materials are used</b>						
WCC and CF8M	Studs	Steel SA-193-B7M	-48 <sup>(2)</sup>	427	-55 <sup>(2)</sup>	800
	Nuts	Steel SA-194-2HM				

1. Derating is not required for CL150 and 300 valves. Derating may be required for valves rated at CL600. Contact your Emerson sales office for assistance in determining the derating of valves when these body-to-bonnet bolting materials are used.  
 2. -29°C (-20°F) with WCC body material.

## Ordering Information

Inlet pressure and temperature must always be limited by the applicable ASME pressure/temperature rating. Pressure drop information for various trim material combinations is provided in figures 11, 12, and 13. The maximum allowable pressure drop for the application must not exceed the lowest value indicated for the combination of materials selected.

When ordering, specify:

## Application Information

1. Type of application:
  - a. Throttling or on-off
  - b. Reducing or relief
2. Controlled fluid (include chemical analysis of fluid if possible)
3. Specific gravity of controlled fluid
4. Fluid temperature
5. Inlet pressures:
  - a. Minimum
  - b. Normal
  - c. Maximum
6. Pressure drops:
  - a. Minimum flowing drop
  - b. Normal flowing drop
  - c. Maximum flowing drop
  - d. Maximum at shutoff
7. Flow rates:
  - a. Minimum controlled flow
  - b. Normal flow
  - c. Maximum flow
8. Maximum permissible noise level, if critical
9. Shutoff classification required
10. Valve stem diameter and bonnet type (plain, extension, or ENVIRO-SEAL bellows seal bonnet)
11. Line size and schedule

## Valve Information

To determine what valve ordering information is needed, refer to the specifications. Review the description for each specification and in the referenced tables; write down your choice whenever there is a selection to be made. Always specify the valve design letter designation.

## Actuator and Accessory Information

Refer to the specific actuator and accessory bulletins for required ordering information.
